The **NEW XT Trailer Tent** range is constructed using high quality fluorocarbon impregnated ripstop canvas, commercial YKK zips, double stitched seams for added strength and a sturdy aluminium and polystyrene composite base.

It also includes a completely separate ripstop canvas flysheet which enables a larger insulating airspace above the tent roof thus making the interior of the tent noticeably cooler. Further enhancing airflow, the XT Deluxe comes standard with a "Stargazer" type roof enabling you to zip open the roof while being fully insect screened at the same time.

Fluorocarbon impregnation also enables much faster water run-off in wet conditions, and coupled with the ability to tension the flysheet separately, no water damming occurs.

The XT Deluxe Trailer tent is a crossover between a traditional roof top tent and a trailer tent. This makes setup quick and easy taking less than 10 minutes. The unique hinge bed design keeps packed size down while still allowing for a large super king size bed at 215 x 200cm once opened.

- Optional Extras
- Trailer
- Canvas
- Tent Base (bed size)

- Measurements in cm
- Bed Size is 215 x 200cm
- Ideal Height of trailer rack is 155-160cm off the the ground
